

Case Story

The Kempinski Hotel of Nikopolis Thessaloniki, Greece

Being open as of May 2003, The Kempinski Hotel of Nikopolis Thessaloniki is a 5* deluxe hotel in Thessaloniki with an architectural style representing the new millennium. With its unique design and state of the art facilities, the hotel offers the highest level of services to business travellers as well as to tourists.

The visually stunning property consists of a cluster of low-rise buildings extending over 20,000 square metres of exquisitely landscaped gardens with palm trees and the largest outdoor swimming pool in Greece (1700 square metres).

The Kempinski Hotel needed for sixteen of its employees to remain reachable, yet mobile at all times. The employees were to be able to move around on the hotel premises while still being able to receive incoming calls as well as to make calls themselves.

The KIRK System 1500 was the ideal choice to meet the needs of the Kempinski Hotel and was thus installed. After the installation, the Kempinski Hotel employees are much more mobile and flexible, but can still be reached immediately when needed, both by clients and by colleagues.

The Kempinski Hotel of Nikopolis solution:

- KIRK System 1500
- 8 base stations-RFP
- 6 repeaters-WRFP
- 16 KIRK 3040 handsets
